UN BREVE RESUMEN

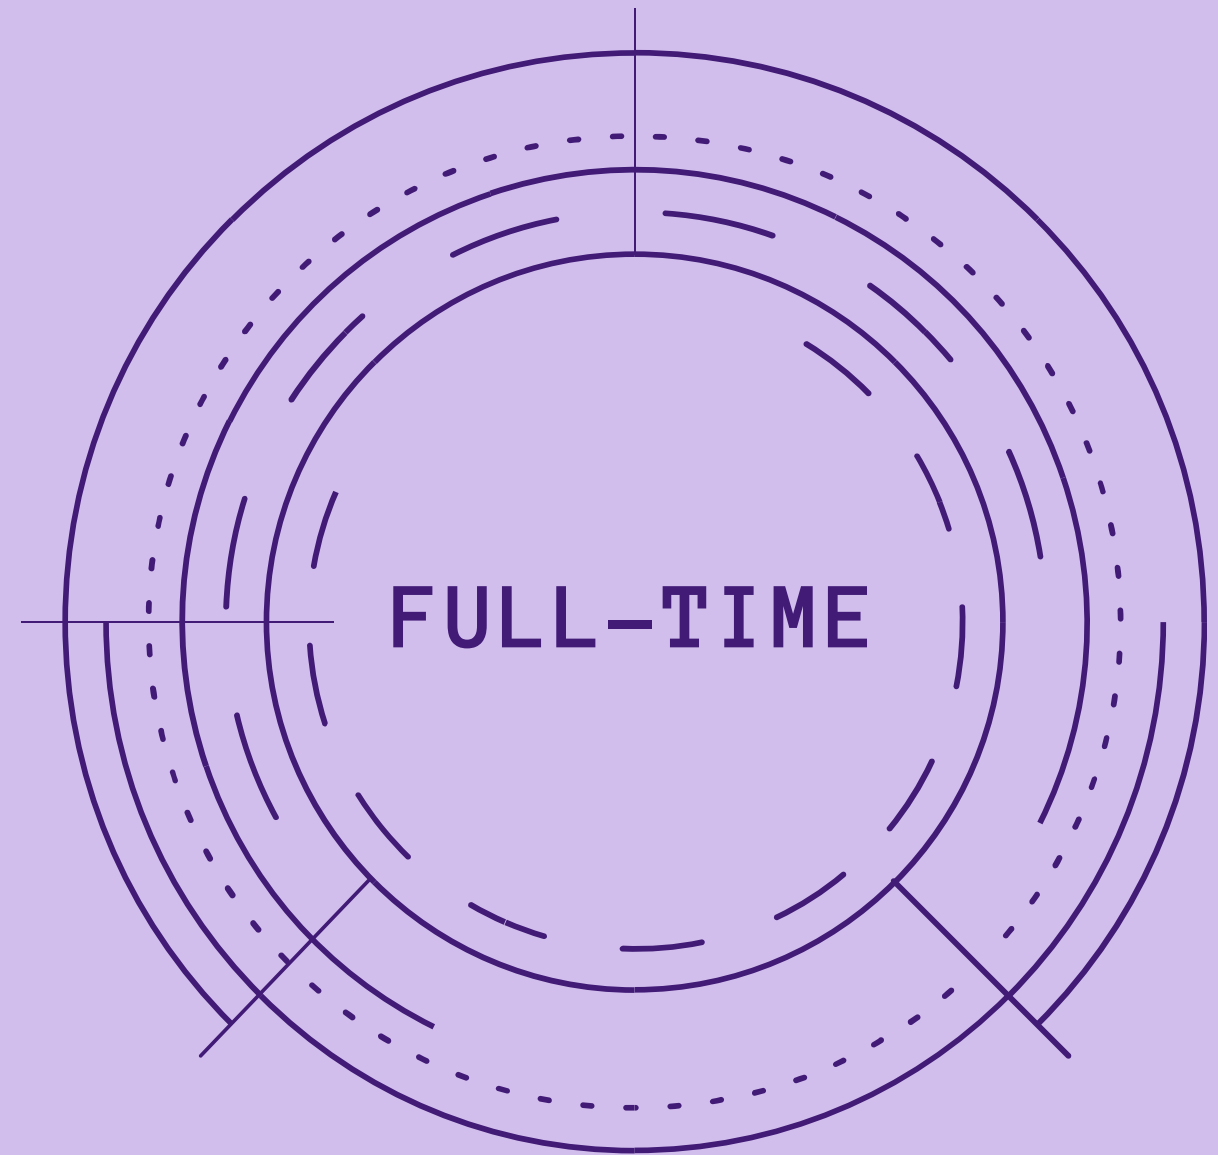

- Internships vs Full-Time
- Dream Job // Visualizacion
- Que buscar en una internship?
- Tips and tricks
- Mi experiencia

INTERNSHIPS VS FULL-TIME

- DURACION CORTA
- BECA
- MENOS EXPERIENCIA
- PROBAR VARIOS CAREER PATHS
- APRENDER//ENTRENAMIENTO

- DURACION COMUNMENTE LARGA
- SALARIO Y PRESTACIONES*
- EXPERIENCIA MINIMA
- COMENZAR UN CARRER PATH
- APRENDER//TRABAJO

```
@migration_number = self.class.next_migration_number(migration_dir)
@migration_file_name = File.basename(destination, ".rb")
@migration_class_name = @migration_file_name.camelize
end

# Creates a migration template at the given destination. The difference
# to the default template method is that the migration version is appended
# to the destination file name.
#
# The migration version, migration file name, migration class name are
# available as instance variables in the template to be rendered.
#
# migration_template "migration.rb", "db/migrate/add_foo_to_bar.rb"
def migration_template(source, destination, config = {})
  source = File.expand_path(find_in_source_paths(source.to_s))

  set_migration_assignment(destination)
  context = instance_eval("binding")

  dir, base = File.split(destination)
  numbered_destination = File.join(dir, ["%migration_number%", base].join("_"))

  file = create_migration numbered_destination, nil, config do
    if ERB.instance_method(:initialize).parameters.assoc(:key) # Ruby 2.6+
      ERB.new(::File.binread(source), trim_mode: "-", eoutvar: "@output_buffer").result(context)
    else
      ERB.new(::File.binread(source), nil, "-", "@output_buffer").result(context)
    end
  end
end

Rails::Generators.add_generated_file(file)
end
end
end
```

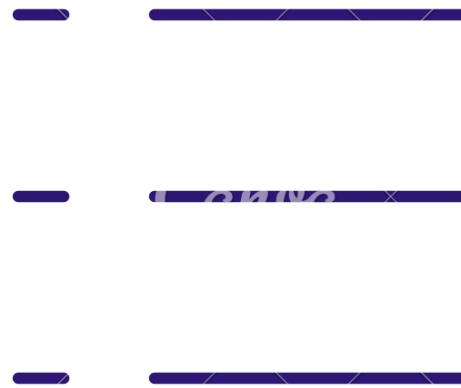

DREAM JOB

QUE QUIERO HACER?

- Economía
- Tiempo
- Visualización
- Contexto
- Disfrutar lo que haces
- Balance laboral-personal

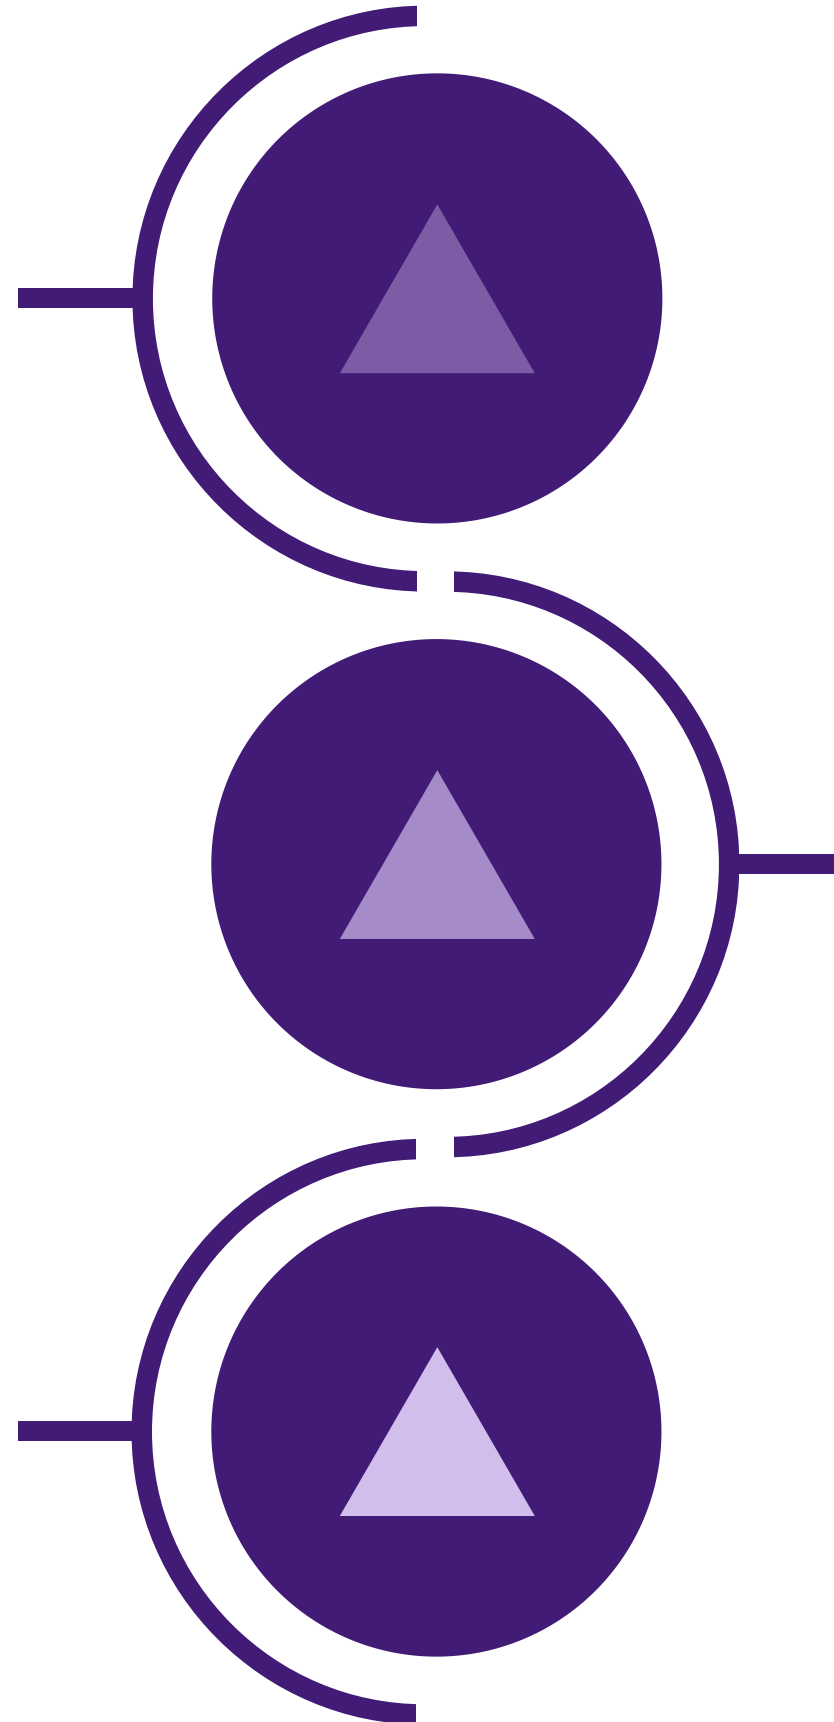

QUE BUSCAR
EN UNA
INTERNSHIP?

CRECIMIENTO

Podrías hacer lo que te gusta hacer
y crecer en ese ámbito.

VALORES

Feedback, libertad, cultura.

AMBIENTE LABORAL

Certificaciones externas, ambiente
de confianza.

PERO SOBRE
TODO...

QUE CUBRA TUS NECESIDADES

```
destination = File.expand_path(destination, destination_root)

migration_dir = File.dirname(destination)
@migration_number = self.class.next_migration_number(migration_dir)
@migration_file_name = File.basename(destination, ".rb")
@migration_class_name = @migration_file_name.camelize
end

source = File.expand_path(find_in_source_paths(source.to_s))

set_migration_assigns!(destination)
context = instance_eval("binding")

dir, base = File.split(destination)
numbered_destination = File.join(dir, ["%migration_number%", base].join("_"))
```

ECONOMICAS – LABORALES – PERSONALES

|

|

|

|

|

|

```
def set_migration_assigns!(destination)
  destination = File.expand_path(destination, destination_root)

  migration_dir = File.dirname(destination)
  @migration_number = self.class.next_migration_number(migration_dir)
  @migration_file_name = File.basename(destination, ".rb")
  @migration_class_name = @migration_file_name.camelize
end

# Creates a migration template at the given destination. The difference
# to the default template method is that the migration version is appended
# to the destination file name.
#
# The migration version, migration file name, migration class name are
# available as instance variables in the template to be rendered.
#
# migration_template "migration.rb", "db/migrate/add_foo_to_bar.rb"
def migration_template(source, destination, config = {})
  source = File.expand_path(find_in_source_paths(source.to_s))

  set_migration_assigns!(destination)
  context = instance_eval("binding")

  dir, base = File.split(destination)
  numbered_destination = File.join(dir, ["%migration_number%", base].join("_"))

  file = create_migration numbered_destination, nil, config do
    if ERB.instance_method(:initialize).parameters.assoc(:key) # Ruby 2.6+
      ERB.new(::File.binread(source), trim_mode: "-", eoutvar: "@output_buffer").result(context)
    else
      ERB.new(::File.binread(source), nil, "-", "@output_buffer").result(context)
    end
  end
end
```

ENCORA ACADEMY

OBTENER UN BUEN PRIMER TRABAJO EN SOFTWARE

- Entrenamiento intensivo
- Apoyo de la comunidad
- Mentores
- Networking

A poster for Encora Academy's Software Engineering Internship. The background is a dark blue image of a smiling man with a beard, wearing a black t-shirt, sitting in a crowd. The text is white and blue. It includes the location "México", the title "Encora Academy", the subtitle "Software Engineering Internship", a section for "Requirements" with three bullet points, and contact information for sending a resume.

📍 México

Encora Academy

Software Engineering Internship

Requirements:

- Last semester or graduate from programs related to software development
- Good English communication
- Complete successfully the recruiting process

Send your resume to:
viridiana.mireles@encora.com

```
require "active_support/concern"
require "rails/generators/actions/create_migration"
```

```
module Rails
  module Generators
    # Holds common methods for migrations. It assumes that migrations have the
    # [0-9]*_name format and can be used by other frameworks (like Sequel)
    # just by implementing the next migration version method.
    module Migration
      extend ActiveSupport::Concern
      attr_reader :migration_number, :migration_file_name, :migration_class_name

      module ClassMethods #:nodoc:
        def migration_lookup_at(dirname)
          Dir.glob("#{dirname}/[0-9]*_*.rb")
        end
      end
    end
  end
end
```
